

Incident Command

Thank you for your patience as Kettering Health Network attempts to support Governor DeWine's request regarding temperature screenings for all employees. Currently this policy is consistent for all Kettering Health Network partners including vendors, physicians- even those moving between hospitals, and EMS. Screenings will take place with temporal scanning thermometers that are cleaned in-between screenings. If this thermometer is not working, you should not be asked to remove your PPE to obtain an oral temperature. We are currently working to re-educate our screeners at all network facilities. We appreciate your continued cooperation and partnership.
