

EMS Patient Entrance Detour Wednesday, August 16 – Beginning at 6 a.m.

Use Private Ambulance Entrance Doors

We're pleased to share that the external main EMS doors at MVH will be replaced on Wednesday, August 16. The crew will be here at 6 a.m. and expects to work the entire day.

During this time, please use the private ambulance doors north of our normal doors, just past the hazmat garage. You can enter the emergency department through the back hall next to our central supply area. There is no change in ambulance parking. Signage will be posted.

Please note: The first lane of the medic ramp may be blocked for about an hour that morning as the crews will need to demo and remove the old doors and unload the new ones. They will move any trucks/equipment that may be necessary as soon as possible.
