

To: All EMS Providers

Miami Valley Hospital is committed to making the communication in the trauma bay a priority. EMS communication with the Trauma Team is a key component of the overall trauma patient care process. With this in mind, we are trialing a communication process called the “RED CAP LEADER”. When EMS arrives the RED CAP LEADER will be identified by wearing a RED CAP. During the handoff, EMS will communicate their MIVT (Mechanism, Injuries, Vitals & Treatment) report to the RED CAP LEADER.

Please take the short evaluation on the pink paper in the EMS room. We appreciate your feedback! Please contact Premier Health EMS Coordinators with any questions.
