

AdvancedIQ

Beyond Red 1

IN-PERSON TRAINING

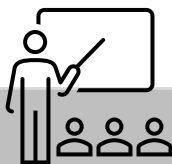

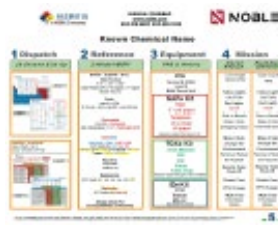

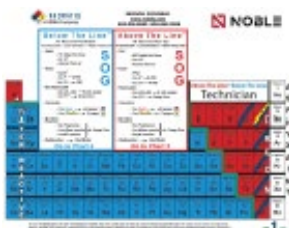

This 8-hour course builds upon the knowledge gained from our flagship Above the Line/Below the Line program. The course will cover:

1. A brief review of the foundational Above the Line/Below the Line System.
2. Using complex scenarios, students will be challenged to think critically, expanding on the knowledge and skills gained from the Above the Line/Below the Line system.
3. Going **Beyond Red 1!**
 1. Red 1, is the play for responding to unknowns, no match, or not sure.

Utilizing an additional chart, students will be able go from a Red 1 to the correct “play”, using chemical trade names, synonyms and/or chemical formulas.

The image displays several training materials:

- Above the Line** and **Below the Line** charts: These are complex tables with columns for 'Action', 'Equipment', and 'Notes'. They list various chemical agents and the corresponding response actions.
- Carbon Count (Order)** table: A table with columns for 'Agent', 'Color', 'Order', and 'Notes'. It lists agents like HCN, H₂S, and SO₂ with their respective carbon count orders.
- Reference Chemical Names** chart: A chart with columns for 'Chemical Name', 'Reference', 'Equipment', and 'Notes'. It lists various chemical names and their corresponding reference numbers and equipment.
