

RAD-IQ TRAINING

IN-PERSON TRAINING

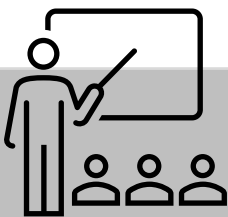

This 8-hour training course takes responders through basic radiation principles to response tactics/decision making. Rad-IQ Covers Radiation Fundamentals, Units and Conversions, Safety Principles, Transportation Incidents, Radiological Response with Survey Techniques, and finishes with hands on practical exercises, designed to enhance the responder's ability to use and deploy radiation detection instrumentation safely, efficiently and effectively.

Throughout the course, laminated charts will be provided as field tools for the responders.

LEARNING OBJECTIVES:

- Radiation Fundamentals
- Radiation and Radiation Units
- Radiation Safety Principles
- Transportation
- Response
