#### Evaluation on the Strengths/Areas for Improvement of Instructors

Comments
Awesome lecture. Helped reflect on current life and need to make changes to rebalance life. ??
Best session attended. Insightful and engaging.
biggest issue to me is that it is hard to hear how to balance work and life as a firefighter from somebody who hasn't done the job. Lots of nuances of the job place demands on us that are hard to relate to if you aren't a firefighter.
Class needs to be longer
Did a great job
Eye opening tools provided. Thank you!
Good information with some decent takeaways. It will get better over time when the instructor learns more about our culture.
great class! I will be looking into bring Donnie in to speak to our local.
Great class!!! Much benefited from this course!
Great class, best of ALTS
great class. This could benefit all firefighters to balance home and work life.
Great class. This is a class that everyone needs, especially with the need with for firefighter mental health awareness and support.
great class. very interactive. could definitely be a longer class
Great course. Very relevant information for the fire service.
Great speaker! Learned a lot of useful information from this session that I can take back.
Honestly a waste of time. I'm not sure what the actual point was of this class. 2 hours is entirely too long. The information can be covered in about 20 mins.
I don't know what was trying to be taught or presented in the class. Learned nothing new outside of common sense.
In some cases classes taught to firemen by people who are not in public safety is a waste of time..... This Instructor connected with the group very well and gave very useful information and tools for life
It would be nice to have the session be a bit longer to expand more into the topic. Very informative and relative to myself, IAFF officers and the fire service in general.
Listening to Donnie speak on his experiences with a work/life balance was very productive. I will be taking his points and knowledge home for both my membership and personal life.
Made a good connection between our high stress job and our particular issues.
More classes like this should be stressed
More time for class
One of the best presentations I've participated in!
Phenomenal session. Donnie was great, not only with presentation, but with student interaction. Class can go 3 hours, possibly 4. Will definitely seek additional guidance from him.
PowerPoint attachment not updated to reflect PowerPoint used in class.

Priorities
This class was very good. It really makes you stop and think about life! Donnie is very easy to talk to and encouraged class participation which came easy with him.
This has been one of the best classes I have ever taken at a union function I've been to ALTS 4 times. Been union leadership for 12 years. Various and multiple conferences. This should be a required class for all members. Can we get this on a video and sent out to membership?
This topic is as important as the cancer and behavioral health. In fact it intertwined with those other topics. The instructor was great and his teaching style was very conducive to the topic and IAFF members
Unreal instructor
Very interactive instructor that was focused on delivering what the group needed. Very well done

Amazing class. Every quality you need in a class
Great class
Great idea, should continue to grow on this idea
Great information to use and share.
Great information. Brought things into perspective.
Great new class
Great session
Great session that reinforces what we should already know. Good tune up to put things back in perspective
I didn't really get anything out of it
Need an additional instructor from the fire service to relate to our culture.
Nice class
This class might need more time
This would be a good course to expand into a couple of sessions.
Very good info. Nice to have to pass on to our members
Very great class about putting things in perspective.
Wish I'd had the class years ago.
